NORTH KOREA: The sources used for this study clearly indicate that the government of North Korea is among the most repressive in the world with respect to religion as well as other civil liberties. But because North Korean society is effectively closed to outsiders, the sources are unable to provide the kind of specific and timely information that Pew Research coded in this quantitative study. Therefore, the report does not include a score for North Korea on either index.

YEMEN: Starting with data covering 2016, researchers changed the way they coded social hostilities in Yemen. See the Methodology for more details.
